MS 3 - What Is It?

Definition: Incorporate O&M stocks above the PLL/shop stocks into the SSF

Assumptions

- Includes the Army National Guard
- Implement in FY 02 following BOD approval
- Includes NAMI in SARSS and AMCISS
- GCSS-A partially deployed
- SSF MS 3 won't degrade current materiel readiness
- MS 3 business rules apply Army-wide at the implementation of MS 3

Characteristics

- SARSS/AMCISS NAMI is in Army stock fund.
- Requirements Determination Optimization and capability to optimize distribution process evolving. HOWEVER, Commanders will retain capability to determine ASL stockage requirements IAW DA policy.
- Integrated supply and financial processes.
- AMC is the logistics manager for the Army through partnership with the MACOMs and IAW HQ DA policy.
- Materiel Readiness is maintained.

Summary

- **SSF changes at Milestone 3 are more subtle than Milestones 1&2 changes**
- **Most Automation linkages already in place**
- **It's an extension of new integrated "business" processes developed under MS 1&2**
- **The MS 3 work will focus on:**
 - **Synchronization of information between the field and national**

Conclusions

- **SSF is a key Enabler for the Army!**
- **When we can clearly see it -- we can manage it!**
- **SSF is inter-related, but distinct from, several other on-going changes**
- **It is a culture change -- extremely complex -- a process that will take us several years to mature**

Reducing the Logistics Footprint
